

Welmin DRY COW PREMIUM

Formulated to ensure adequate supplementation of all key minerals and vitamins during the dry cow period to boost the wellbeing of the cow.

30% multi-source **Magnesium** – high solubility magnesium sources to reduce the prevalence of clinical and sub-clinical milk fever.

Selenium in three forms to reduce retained cleanings, weak calves, and abortion in late pregnancy. Increase transfer of Selenium from mother to its offspring via colostrum and milk.

Copper in three forms to reduce deficiencies on farm and improve thrive and health.

Zinc in three forms to improve immune response, enzyme systems and hoof health.

High **Vitamin E** inclusion – 7,000 iu/kg. Lowers incidence of retained cleanings and metritis. Together with Selenium, Vitamin E acts as an antioxidant.

Two forms of **Iodine** to minimise the risk of deficiency induced issues around calving (e.g. weak calves and/or increased calf mortality).

Phosphorous %	3
Magnesium %	30
Sodium %	7.5
Manganese mg/kg	3,350
Zinc Total mg/kg	7,950
Zinc Chelated mg/kg	375
Hydroxy Zinc Chloride mg/kg	375
Copper Total mg/kg	3,000
Copper Chelated mg/kg	2,000
Hydroxy Copper Chloride mg/kg	500
Iodine as Potassium Iodide mg/kg	250
Iodine as Calcium Iodate mg/kg	250
Cobalt mg/kg	100
Selenium Total mg/kg	50
Organic Selenium / Selenomethionine mg/kg	10
Vitamin A iu/kg	500,000
Vitamin D3 iu/kg	200,000
Vitamin E iu/kg	7,000
Vitamin B1 iu/kg	250
Vitamin B12 mcg/kg	1,500

Feeding rate: 100-120g/day

Packaging: 20kg bag

For lactating cows, consider WELMIN DAIRY BOOST. Formulated to enhance and support the productivity of the lactating cow and improve the calving interval and herd replacement index of the breeding herd.
