GroQuik® Seed Stimulant Included

GroQuik® is a biological seed stimulant which accelerates germination and root development in both grasses and clover.

➤ Increased germination rates of 14.8% at post-emergence stage (equates to 1.16 million plants/ha)

➤ 8.3% more grass available in the first grazing post-sowing (equivalent to 131 kg DM/ha)

➤ 5.4% more grass available in the first season of establishment

➤ 4.3% more grass available in the first 12 months of establishment
